Production Flow Chart

Quality Assurance

First step to quality control is the selection of right yarn. It is the sole responsibility of our MD to select and collect the right yarn.

We always ensure the selection of correct Dia with regards to knitting and production of quality Gray Fabrics.

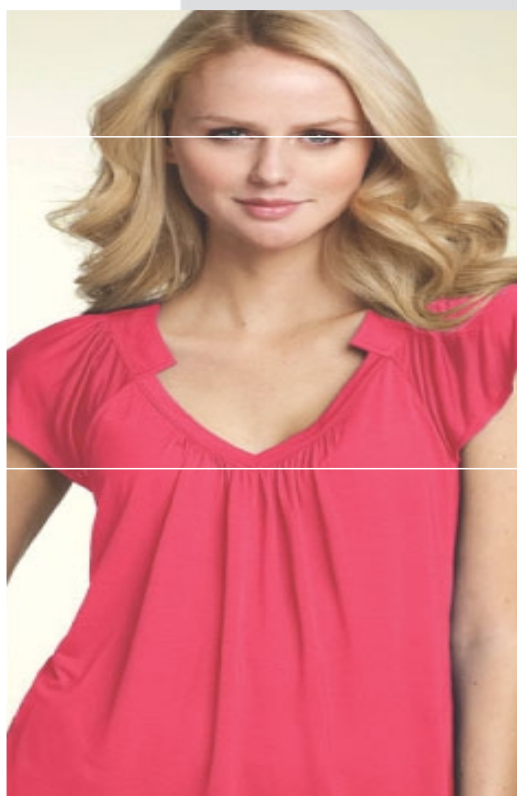

As said earlier, our nominated Dyeing Factories control the quality of production under our direct supervision. It remains their endeavor also. so that their produced fabrics are always Azo Free and Oeko-tex 100 standard.

Immediately after receiving the finished fabrics in our Sewing Factory, our Cuttingmen diligently carry out their checking to discard the defective parts of the fabrics and start cutting.

Our company is a family of 250 members. Each member is very much committed and sincere in maintaining the quality of our products.
